School

The Graduate School Sfb658, integrated in the Dahlem Research School "Molecular Science", announces the sixth

Interdisciplinary Graduate Seminar 2015

"Molecular switches at surfaces"

Date: 24th March 2015, at 9:00–16:30

*Place: lecture hall A (room no. 1.3.14)
Physics Inst. FU-Berlin; Arnimallee 14, 14195 Berlin*

The lectures are oriented to experimental and theoretical scientists who perform their research in a field related to molecular science, at both pre-doctoral and post-doctoral level

The seminar is composed on a series of 4 lectures as follows:

Tillmann Klamroth	U Potsdam	Quantum chemistry and nuclear dynamics for molecular switches
Cornelius Gahl	FU Berlin	UV/vis spectroscopy of thin adsorbate layers
Antonio Setaro	FU Berlin	Introduction on nano-carbon and its optical spectroscopy
Mohsen Adeli	FU Berlin	Controlled functionalization and post-functionalization of carbon surfaces
