

Dates

August 1 - 26, 2106

Berlin: August 1 - 13, 2016

Uppsala: August 14 - 26, 2016

Application & Grants

Successful applicants will receive a grant of 1000,- Euro for travel expenses and accomodation.

Application Deadline: May 13, 2016

For further information and the application form see our webpage:

Berlin - Uppsala Summer School

Diversity in the Cultures of Physics

picture: Joanne Lam

learn about
the variety of research fields in physics
the context of physics research
the opportunities for a career in physics

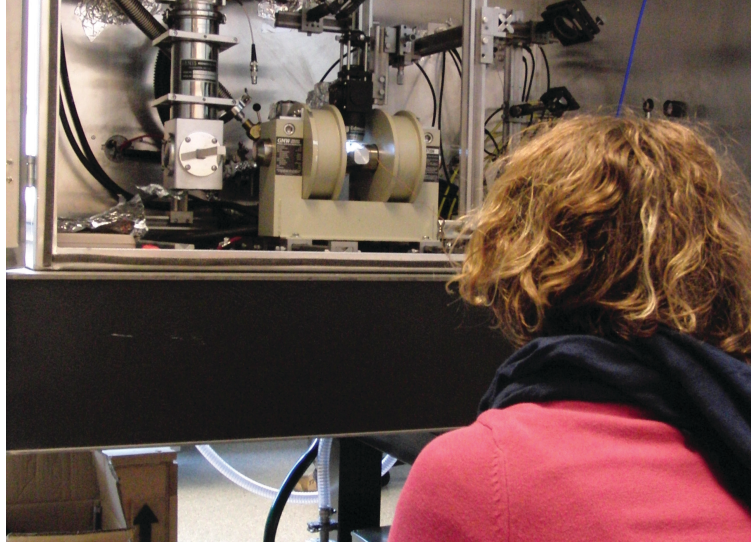

The Summer School

Are you a physics student at German or Swedish university? Are you enrolled in a master's program or at the beginning of a PhD program? Are you interested in the political and social framework of doing physics? Do you want to know more about how physics is shaped by gender and diversity?

Then you can profit from attending the Berlin-Uppsala Summer School. It is primarily addressed at young physicists during the crucial transition phase from master to PhD studies and the related career and life planning.

The Summer School was launched by the Department of Physics at Freie Universität Berlin. The German-Swedish exchange program for 2016 will be realized in cooperation with the Physics Department at Uppsala Universitet.

Additional summer schools with physics research institutions in other European countries are planned for the coming years.

Aims of the Summer School

- gain an insight into the variety of physics research in Europe
- establish contacts which may result in future collaborations and stays abroad during the graduation work
- get to know the professional networks in physics
- learn about national and international equality oriented advancement programs for young scientists
- become familiar with work place cultures of physics in their cultural, political and everyday context
- learn about equality politics at European universities and research institutions
- learn about the role of gender and diversity in physics
- **Recognize and explore the diversity in the cultures of physics**

Program of the Summer School

You will spend 4 weeks together with the other participants of the summer school, in Berlin (2 weeks) and in Uppsala (2 weeks).

In each country the courses offered will include the following events:

- Lectures and visits to research groups in the Physics Department of the university
- Visits to other research institutions and universities in the region
- Contacts to equality-oriented institutions and activities at the universities and cooperating institutions as well as in the national associations and foundations,
- Lectures and discussions on gender & science studies.
